

MQTT

Eventi sensori

```
locales/{localeId}/games/{gameId}/matches/{matchId}/events
```

Payload:

```
{
  "event_uuid": "edge-1-10-12345-1",
  "device_id": 1,
  "event_type": "GOAL_PLAYER_1",
  "match_id": 10,
  "game_id": 1,
  "locale_id": 1,
  "player_name": "mario",
  "description": "Punto di mario",
  "created_at": "2026-07-16T18:00:00.000Z",
  "sync_status": "SYNCED"
}
```

Comandi attuatori

```
locales/{localeId}/games/{gameId}/actuators/{actuatorId}/commands
```

Heartbeat edge

```
locales/{localeId}/edge/{deviceId}/heartbeat
```

Viene usato QoS 1. `event_uuid` rende l'elaborazione idempotente.
